

Systems

Control boxes construction

This worldwide first Plug & Play system for oversize transporters, with hardware based on the modular design principle, offers a great simplified control system

Following boxes are available:

- Steering
- Driving
- Lifting
- Cabin operation
- Illumination
- Compound system
- Power distribution
- Track guidance
- Remote access and data transfer
- Complete driver's cabin

Cabin box

Illumination box

Steering box

Lifting box

Power box

Driving box

The advantages are obvious

The advantages of our system make it to a unique control system for every kind of mobile applications

- Especially for every application easy scalable
- 100% pre-checked
- Plug & Play capable
- Instalable also by lay person
- Easy and clearly
- Very short installation time
- Detailed diagnose process

Some more advantages

- Different technical facilities possible
- All parts from one supplier combined in one system
- Equipment from power supply right up to the illumination
- Water proof stainless steel cabinets (IP66)
- Industrial made cables with IP67 connectors
- Special embedded water proof controllers (IP67)
- Powerful controllers made for mobile application
- Very robust displays
- Safe functions, because of system supervision
- Safe communication by CAN-Bus
- Easy and clearly arranged cabling
- No wiring work necessary only connectors used
- Easy and very fast repair, maintenance and overhaul
